

We provide innovative, bespoke and cost-effective water and environmental solutions for industrial and commercial clients throughout England and Wales

When Albion Water was licensed to become the water company for Shotton Paper by the Water Services Regulation Authority (Ofwat) in 1999, it became the first new entrant to compete against the regional monopoly water companies. Legally, we have the same powers and responsibilities as any other water company in England and Wales.

Since then we have established an exemplary quality and environmental record, building a hard-won reputation as a water company prepared to innovate and to promote a better, more responsive water industry.

At the forefront of the competitive wholesale water sector we aim to provide an exemplary level of engagement and to ensure that our water, waste water, sustainable drainage systems (SuDS) and wider environmental services are sustainable, resilient and offer commercial and environmental benefits to all customers.

As a licensed water operator we are currently working with several industrial and commercial clients to obtain discharge permits where the client has been unable to. We can then operate the treatment system and assume responsibility for meeting the Environment Agency's discharge consent conditions.

We are also working with clients to dispose of excess water from their industrial processes, by exploring the options of on-site treatment works or local discharge to ground.

WE CAN PROVIDE THE FOLLOWING:

WATER AND WASTE WATER CONSULTANCY

ON-SITE GREEN WATER TREATMENT WORKS DESIGN, CONSTRUCTION, ADOPTION AND OPERATION

WATER DISTRIBUTION SYSTEM DESIGN, CONSTRUCTION, ADOPTION AND OPERATION

WATER EFFICIENCY ADVICE

TO DRIVE SUSTAINABLE  
WATER USE

100 BILLION  
LITRES OF WATER  
DELIVERED TO  
END CUSTOMERS

Since 1999 we have worked with paper mills, food and beverage companies, hospitals, chemical manufacturers and the extraction industry, in each case the client was faced with a water or wastewater issue that required an innovative approach with a flexible solution. Albion Water has provided advisory services to unlock water supply and disposal problems and has undertaken research into sustainable treatment of nutrients and pharmaceutical products.

We can offer solutions for companies with large water use or waste water discharges in the following sectors: heavy industrial, factories, mills, chemical and petrochemical plants, chemical and petrochemical storage and distribution, food and beverage production, abattoirs, pharmaceuticals, medical and healthcare.
